

KITSAP Robotics & Electronics Enthusiast Group (KREEG)

Meeting Minutes 29 June 2012

Attendees		
Doyle Maleche	Wayne Cazier	Emily Oliphant
Jim Adamson	Jason Adamson	Jerry Holaway
Rich Peel	Braxton Brown	Charlie Johnson

Hello KREEGers,

We had our first KREEG meeting at my house and it went very well. We started by having each attendee introduce and convey their hobby, skills, current job, and what they would like to get out of the group/KREEG. So far, we have a lot of robotics interests and folks wanting to learn basic electronics – more on analog and real-world interfacing.

I intend to put together various learning topics for each meeting and will publish a list of topics/lessons to be discussed in future meetings along with a ‘show and tell’ of goodies for your robots like; gyros, GPS, accelerometers, sonar/radar, robot vision, long & short range video transmitters, long & short range controls, microcontrollers, motor drivers, and programming.

Next meeting will introduce the Arduino microcontroller and capabilities. This is a very popular and well supported open-source microcontroller with a fan base all over the world! Go to YouTube and enter ‘Arduino’ in the search engine to view the many projects others have made and interfaced with the Arduino. This might spark some ideas for your next project!

If you would like to learn something unique or a need for your project, let me know. I encourage you to also share your skills and knowledge and submit a 15-20 lesson topic to teach at future meetings. I will add it to the meeting schedule.

Thanks to all who attended and shared your experience and ideas. I look forward to seeing you at the next meeting (the schedule will appear in the footer of each newsletter). Bring your friends and expand the fun!

NEXT MEETING:

Date: Wednesday, 25 July 2012

Time: 6:45pm – 8:00pm

Location: Doyle’s house 16979 Clear Creek Rd. Poulsbo, 98370. Directly across the street from the Poulsbo Sportsman Club (shooting range)
